

AI RegWatch: AI Regulatory Compliance Checking Platform

This comprehensive end-to-end platform, "AI RegWatch: AI Regulatory Compliance Checking Platform", centralises regulatory publications, automatically generating summaries and structured insights, while supporting complete workflow tracking. Enable real-time monitoring of impact assessments, compliance deadlines, and emerging risks. By automating surveillance and enhancing cross-team collaboration, the solution substantially reduces workload, and strengthens governance and auditability throughout regulatory change management.

Industry Challenges

- **Fragmented Monitoring:** Manual surveillance across multiple regulators creates duplication and inefficiency
- **Missed Updates:** Critical regulatory changes slip through overwhelmed teams
- **Inconsistent Interpretation:** Varied understanding across departments creates compliance gaps

Major Benefits

- **Automated Surveillance:** Eliminates manual monitoring, liberating valuable staff time
- **Instant Clarity:** Clear, AI-generated summaries accelerate comprehension of complex changes
- **Enhanced Collaboration:** Shared tracking and workflows unify cross-functional teams
- **Executive Visibility:** Comprehensive dashboards provide management with clear risk, progress, and compliance insights

Application Areas

- Compliance checking at Banks, Financial institutions and Insurance companies

Collaborator(s)

Banking Industry

Award(s)

AI+ in Business Award (Large Corporate)

This solution captures regulatory publications from regulator websites, and generate summary and highlights with AI agent
